PROFILE

AI Engineer specializing in Large Language Models (LLMs) and Natural Language Processing (NLP), with practical experience in RAG systems, fine-tuning, prompt engineering, and building multi-agent architectures. Skilled in designing and deploying intelligent, agentic AI applications leveraging OpenAI API, LangChain, and modern orchestration frameworks. Passionate about creating scalable, high-performance AI systems that integrate reasoning, retrieval, and automation to solve complex real-world problems.

WORK EXPERIENCE

ridvanyigit Einzelunternehmen - Co Founder & Artificial Engineer Consultant

09/2025 - Present - Vienna/Austria

Pioneering intelligent automation solutions for businesses by leveraging the power of custom-trained Large Language Models and autonomous AI agents. I am responsible for translating complex client needs into robust, scalable, and fully integrated AI systems that deliver measurable business outcomes.

Delta Haritacilik.ltd - Agricultural Engineer

03/2022 - 03/2023 - Hakkari/Turkey

Conducted parcel value increase analyses during zoning plan changes and provided technical support in determining and structuring value increment payment installments.

RY Company.ltd - Founder & Owner

03/2020 - 02/2022 - Van/Turkey

Founded and managed a beekeeping products company, sourcing raw materials from producers, adding value through natural processing, and providing agricultural consultancy services.

Entocev.ltd - Agricultural Engineer

06/2017 - 10/2019 - Izmir/Turkey

Worked as an Agricultural Engineer, responsible for planning and supervising vaccination programs for farm and poultry animals, determining vaccine compositions and dosages, and coordinating pest control, hygiene, and sanitation operations.

EDUCATION

Üsküdar University - Master of Science in Artificial Intelligence Engineering

Istanbul/Turkey

02/2026

Ege University - Bachelor of Science in Agricultural Engineering

Izmir/Turkey

06/2017

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Deep Learning Frameworks: PyTorch, TensorFlow, Keras, Sci-Kit Learn

NLP/LLM Frameworks & Libraries: OpenAI Agents SDK, CrewAI, LangGraph, Transformers, LangChain, MCP, SpaCy, Pydantic, NLTK

AI/ML Concepts & Techniques: LLMs, NLP, Generative AI, RAG, Prompt Engineering, AI Agents, Machine Learning, Deep Learning

Data Engineering & Processing: Data Pipelines, ETL, Feature Engineering, Data Preprocess, Data Cleaning

Databases: PostgreSQL, Vector Databases

Automation & Orchestration Tools: n8n

MLOps Deployment & CI/CD: Docker, Terraform, Git, Github Action, FastAPI / Flask

Cloud Platforms: AWS, Vercel, Modal, HuggingFace Space

PROJECTS

EU AI Act – Master's Project & Advanced RAG Chatbot

End-to-End MLOps & Multi-Model Serving Platform

AI-Powered Spam Message Classification Application

Autonomous Multi-Agent AI Framework for Deal Sourcing

Full-Stack RAG-Based AI Application Deployment

CERTIFICATIONS

AI in Production

The Complete Agentic AI Engineering

LLM Engineering: Master AI, Large Language Models & Agents

Fine Tuning LLM with Hugging Face Transformers

Deploy ML Model in Production with FastAPI and Docker

Tableau: Hands-On Tableau Training for Data Science
